The image is a collage of web interfaces from 2011. At the top left is the Google blogs search bar. Below it is the Google Noticias España interface, showing a sidebar with 'Top Stories' (Politics, US, World, Business, Technology, Video Games, Science, Entertainment, Movies, Television, Sports) and a main content area with 'Noticias destacadas' (Destacadas, Internacional, España, Economía, Ciencia y Tecnología, Espectáculos, Deportes, Salud, Destacados, Más popular). To the right is the Twitter interface with the slogan 'See what's happening — right now.' Below Twitter is the goPubMed interface, which is a search engine for biological data. It shows a 'my search' section with options like Login, Favorites, Edit Knowledge Base, Show Clipboard [0], Find Specific Concept, Previous Queries, and Current Query. The 'what' section lists various biological categories with their respective sizes in megabytes (M): Anatomy [9.881 M], Biological Sciences [15.277 M], biological_process [7.260 M], cellular_component [2.559 M], Chemicals and Drugs [11.325 M], Diseases [11.477 M], Geographicals [3.061 M], Health Care, molecular_fu, Named Groups [0.037 M], Natural Sciences [11.344 M], Organisms [15.650 M], and Proteins [3.820 M]. A yellow box with the text 'filter results here' is overlaid on the goPubMed interface. A woman with long dark hair, wearing a white shirt, is pointing at the goPubMed interface. The goPubMed logo and the slogan 'Searching is now sorted!' are also visible. At the bottom right, there is a red and white striped sphere logo and the text 'TRANSINSIGHT'.

Real time web

Zentralizatua VS Banatua

Denbora errealeko web honen arazoetako bat informazioa jaso ahal izateko prozesua oso azkarra izan behar duela da.

Hau zerbitzu zentralizatu batekin oso erraz lortzen da. Baina sarea egitura banatu bat du kasu gehienetan. Orain arte RSSak ezin zuen denbora erreal hori lortu, baina orain ...

Pachube.com

pachube

[about](#) | [tutorials](#) | [API](#) | [software/hardware](#) | [contact](#)

Store, share & discover realtime sensor, energy and environment data from objects, devices & buildings around the world.
Pachube is a convenient, secure & scalable platform that helps you connect to & build the 'internet of things'. [Sign up here!](#)

The screenshot displays the Pachube.com website interface. At the top, there's a navigation bar with links: [about](#), [tutorials](#), [API](#), [software/hardware](#), and [contact](#). Below this is a header section with the Pachube logo and a description: "Store, share & discover realtime sensor, energy and environment data from objects, devices & buildings around the world. Pachube is a convenient, secure & scalable platform that helps you connect to & build the 'internet of things'. [Sign up here!](#)".

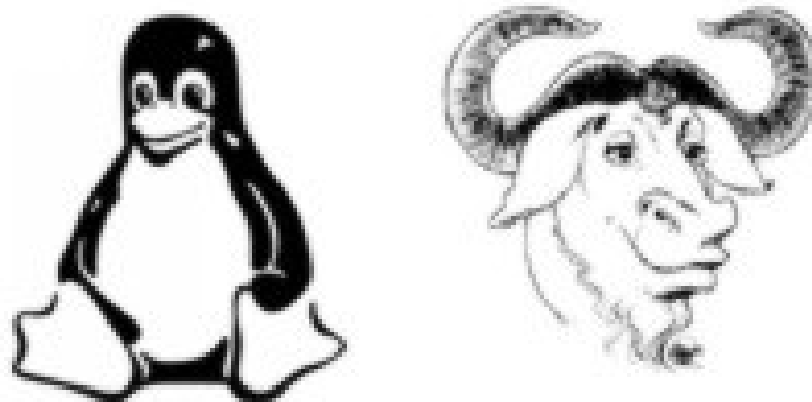

The main content area features a "Map view" tab (selected) and a "List view" tab. Below the tabs is a search bar labeled "search feeds or tags" with a "search" button. A horizontal menu lists categories: [all](#), [agriculture](#), [building](#), [device](#), [energy](#), [environment](#), [transport](#), and [other](#). The central part of the page shows a world map with numerous colorful location pins (red, orange, yellow, green, blue, purple) indicating sensor locations. On the left side of the map, there are navigation controls: a compass, a zoom in (+) and zoom out (-) button, and a full-screen button. On the right side of the map, there are two buttons: "Satelitea" and "Erlikea".

On the right side of the page, there are two main sections:

- input - register a feed**: This section explains that if you have a device, building, environment, or sensor connected to the internet (via wired, wireless, or SMS gateway) and want to store, share, graph, and distribute its datastreams in realtime, you should register a feed. It ends with the text "... then register a feed!".
- output - use a feed**: This section explains that if you have a device, building, environment, or actuator connected to the internet, or if you have a website and want to embed, monitor, or connect to an existing environment, you should use a feed. It ends with the text "... then use a feed!".

At the bottom right, there is a link to "latest news".

Open software libre

- helburua edozein dela ere exekutatu ahal izatea (pribatua, hezkuntza, publikoa, komertziala, eta abar).
- aztertu eta aldatu ahal izatea (horretarako beharrezkoa da kodea eskuratu ahal izatea).
- kopianatu ahal izatea.
- hobetu, eta hobekuntzak horiek publiko egin ahal izatea, komunitatearen onurarako.

Open kultura

- **Copyleft:** zentzu ez legak batean, copyleft-a copyright-aren guztiz kontrakoa dela esan daiteke.

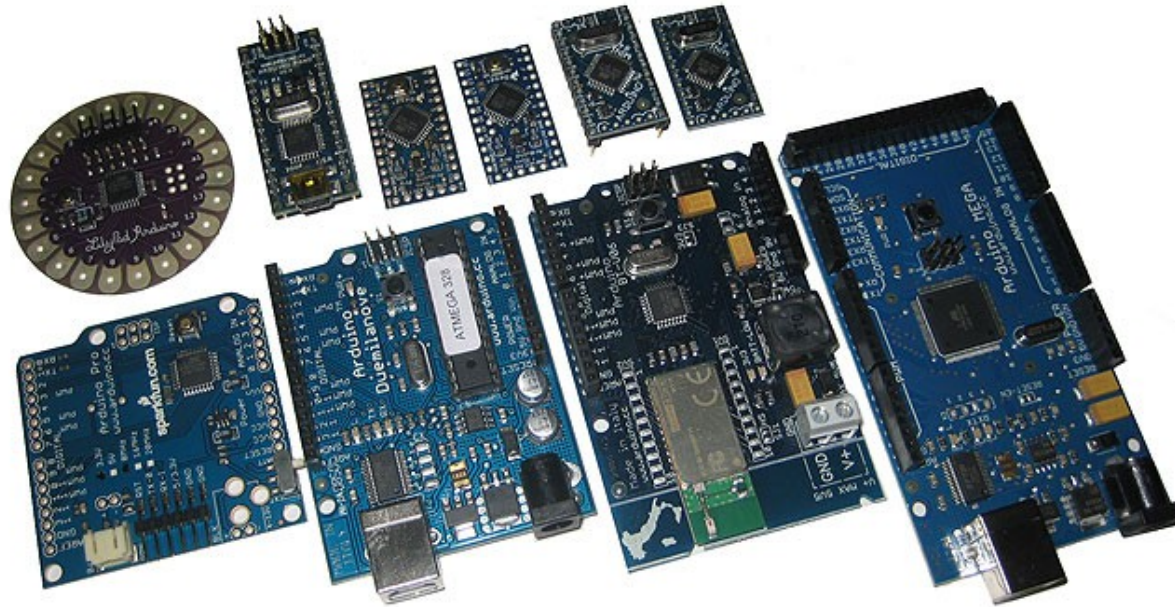

- **Domeinu publikoa:** Literatur, arte edota zientzia lanak hartzen duten egoera egilearen jabetza eskubideen epea amaitzen denean, libreki erabiltzeko aukera ematen delarik.

- **Lizentzia libreak:** lan baten banaketa murriztapen gutxiagorekin egiteko aukera ematen duten lizentziak dira.

Komunitatea sortu

Tresnak ez dira garrantzitsuena eta denak ez du berdin balio. Zenbakiak gainditu gaitzakete, baina garrantzitsuena komunitateak eta ezagutza sortzea da.

Aske zara:

- Lan hau kopiatu, banatu eta jendaurrean hedatzeko.
- Lan eratorriak egiteko.

Baldintza hauetan:

- Aitortu. Lanaren kredituak aitortu behar dituzu, egileak edo baimendunak zehaztutako eran.
- Partekatu baimen beraren arabera. Lan hau aldatzen baldin baduzu, edo lan eratorri bat sortzen baduzu, sortutako lana banatu dezakezu soil-soilik baimen honen berdin-berdineko baten mende.
